SUMMARY

Computer Science graduate with hands-on experience in **Full-Stack Web and Mobile Application Development**, specializing in **React.js**, **Next.js**, **React Native (Expo)**, **JavaScript**, **TypeScript**, and **Node.js**. Experienced in developing responsive user interfaces, building RESTful APIs, and integrating databases to deliver functional and user-focused software solutions. Proficient in modern development tools, version control, and collaborative software development practices. Eager to apply strong problem-solving skills, expand technical expertise, and contribute to building reliable, scalable, and high-quality applications.

EDUCATION

- **B.Sc. in Computer Science & Engineering** 2026
  American International University–Bangladesh (AIUB)
  Relevant Courses: Web Tech, Software Eng., Database Systems, Algorithms, Data Structure, Data Science, AI, ML.

SKILLS

- **Frontend/Mobile:** React, NextJS, React Native Expo, HTML5, CSS3, Tailwind CSS, JavaScript (ES6+), TypeScript
- **Backend/APIs:** Node.js, NestJS, REST APIs, Postman
- **Database:** PostgreSQL, SQLite, Oracle (familiar)
- **Tools/Others:** Git, GitHub, VS Code, Docker, Agile/Scrum, C++, Python

EXPERIENCE

Neurosoft Technologies Ltd **Dhaka, Bangladesh**
App Developer Intern **Feb 2026 – April 2026**

- Developing inventory management app with **React Native (Expo)** and voice recognition for hands-free updates.
- Implementing product addition, sales recording, real-time tracking (manual & voice input).
- Collaborating on UI/UX design, ensuring seamless iOS/Android experience.
- Using REST APIs for backend communication and React hooks for state management.

PROJECTS

- **Verbex AI ChatBot Platform (Full Stack)** – Developed an AI-powered chatbot platform with user authentication, real-time chat functionality, AI integration, and conversation management using modern web technologies. **GitHub**
- **AI-Driven Inventory Management App** – Designing and developing a cross-platform mobile Inventory Management application using React Native (Expo) with real-time data handling. **GitHub**
- **NexifyStore (Backend)** – Seller-module backend using Node.js, NestJS, PostgreSQL, REST APIs. **GitHub**
- **Job Portal Web Application** – HTML, CSS, JS, PHP, XAMPP (role-based). **GitHub**
- **Air Quality Index Application** – Developed an Air Quality Index using HTML, CSS, JavaScript, XAMPP that can show AQI for different cities. **GitHub**
- **Speech to Text Generator** – Using python whisper model that can take user voice and print it in a text file. **GitHub**

ACHIEVEMENTS & CERTIFICATIONS

- Volunteered in multiple events — **AIUB Computer Club** 2022–2024
- **ICCIT 2025 — Paper Accepted** – "Discovering AI Research Trends: Comparative Study with TF-IDF, BERT and PCA-Based Clustering."
